

# Group N°2: Apps & Smartphones

## Break-out sessions

● ESC Education Conference – 31 Jan - 1 Feb 2018

# Current use, challenges and limitations

## Group 2: Apps & Smartphones

### 1) *Current use:*

**Situational:** scoring systems , risk calculators, communication between doctors, guidelines

**Educational:** flash cards, quizzes, YouTube films, Podcasts, news feeds

### 2) *Challenges:*

Independence, updates, prof interaction with patients, standardized operating procedures; patient's data security

### 3) *Limitations:*

Language, not everyone got smartphone, depends on internet availability & speed,  
trust on quality content (source, updated)

# Opportunities for the future & role of the ESC

## Group 2: Apps & Smartphones

- **Interaction between NCS:**

Translation in collaboration with NCS has to be encouraged

- **FEW ESC-apps – “the multitasking app”?**

Minimize the number of apps

- **App including all of ESCel:**

Clinical Cases, courses, webinars, textbooks - portfolio app?

- **Tag systematically**

To make **ALL** contents searchable

- **Tagged news**

Cyclic flashcard news – newsflashes

News feeds – scientific, ESC educational activities news feeds (ESCel)

- **Contextual content (situational):**

Decision support app – flowcharts, algorithms, EBM-levels

# Opportunities for the future & role of the ESC

## Group 2: Apps & Smartphones

- **Think new - different approach to learn & get informed!**

Millenials and the use of new generation media – go faster, audio & video more than textbooks

- Real case collaborative cases?

Engage colleagues to a platform (similar to social media) for discussions and questions around real time cases
