SCIENCE FICTION IN HEALTHCARE

Dr Bertalan Mesko, The Medical Futurist

- Science fiction that helps prepare for the future sneaked into our lives, but why cannot we see science fiction technologies in healthcare?

Message:

Progress in hardware and software is at an almost exponential rate but what matters is how we adopt technologies.

- Digital health helps tackle this. Describing major trends that shape medicine and healthcare presented through futuristic life scenes.

Message:

Healthcare is going to be accessible, personalized, preventive, augmented and humanistic .

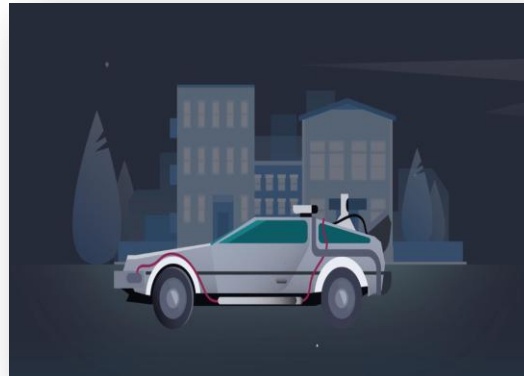

SCIENCE FICTION IN HEALTHCARE

Dr Bertalan Mesko, The Medical Futurist

- Bringing all this together - How it applies to us and the future. What path should we walk on to bring science fiction technology to patients?

Conclusion

- Healthcare could work as efficiently as driverless cars. When one car makes a mistake, all the cars in the fleet learn from it. Thus, every utopia starts with a science fiction idea. The driving forces behind that are digital health and patient
